1. Authorized Items. The Federal Supply Catalog, C-8900-SL, Stock List, lists the foods which may be used for food service. The items which are included in the menu have been chosen from those listed in the catalog. Other authorized foods listed in the catalog but are not included in this recapitulation may be added to the menu by Installation Menu Boards, if desired.

2. Fish Meals. Stock levels of the most acceptable fish and shellfish are normally available in all Defense Personnel Support Center (DPSC) Supply Points. Haddock, cod, catfish, ocean perch, flounder, whiting fillets, and halibut steak may be requisitioned. Installation Menu Boards may change their menus to take advantage of any authorized fish. Also, seasonally and locally available fresh fish and shell fish required for food service, which may not be listed in the Federal Supply Catalog, may be obtained through local purchase.

3. Fruits and Vegetables. Base food service may take advantage of the information contained in the Defense Personnel Support Center News Bulletin to substitute authorized fresh fruits and vegetables, that are more available locally, at the same or lower price than those programmed in the menu.

4. Can and Container Sizes. The can and container sizes specified in the recapitulation have been determined to be the most practical and economical for general dining hall use. Cans and containers smaller than those in this recapitulation may be used for dining halls serving 100 persons or less. The following conversions will be used for requisitioning and issuing small cans to dining halls serving less than 100 persons:

one number 10 can: seven number 200 cans
one number 10 can: six number 303 cans
one number 10 can: five number 2 cans
one number 10 can: four number 2 1/2 cans
one number 10 can: two number 3 cylinder cans

When it is necessary to issue small cans for large ones, issues will be made on a pound for pound basis, in accordance with the conversion factors shown in the Federal Supply Catalog, C-8900-SL.

5. Support of Satellited Organizations. Commissaries supplying rations in bulk to another service, will, upon request of the commander concerned, requisition those items designed for the exclusive use of the service involved.

6. Short Order Meals. Issue quantities for short order meals are listed in the main section in this recapitulation. The meal identification is "SO". The items support the daily short order menus.

7. Special Menu Recapitulation. Requirements for the Thanksgiving and Christmas menus are included in Section 7. Local use of any other special menus programmed in AFP 146-17 will require local additions of the ingredients for those menus to this recapitulation.

8. Recapitulation Format. The Recap has been structured to include only the NSNs, nomenclatures, Unit and Meal, with weekly totals. Local procedure guidance should be followed when reporting your weekly totals.

BEST COPY AVAILABLE

9. Computing Subsistence Requirements.

a. The Recapitulation of Menu Issues (AFP 146-16) is a food service document as well as a commissary document. It is used to communicate food requirements to the commissary. Proper communication between food service and the commissary requisition clerk will reduce the number of not-in-stock (NIS) items and items in excess. It will also help you provide better service to your customer. A revised recapitulation should be given to the commissary requisition clerk before the monthly menu board meetings. In CONUS this should be at least 60 to 90 days prior to the month of use and in oversea areas, 120 to 180 days prior to use.

b. To compute subsistence requirements, food service must begin with the USAF Worldwide Menu (AFP 146-17) and the Food Service Production Log (AF Form 662). The experience of past cycles should be used to develop the requirements for the new cycle. For example, the menu for Jan 1 is the same menu as for Jan 31, which begins the cycle rotation. The full 30 day cyclic menu, will have been served at least once by the time you have your Feb menu board meeting to discuss the menu for May (in CONUS). You can then use the experience of the first serving of the menu to plan your May menu.

c. Refer to AFR 146-7 paragraph 4-9 for procedures to compute your subsistence requirements.

d. At each monthly menu board meeting, food service should also provide weekly and monthly total quantity requirement updates to the commissary requisition clerk. A copy should also be provided to the food service storeroom persons showing projected changes, deletions, and/or additions for 60 to 90 days hence for CONUS activities and 120 to 180 days, for overseas activities.

10. RECAPITULATION DISTRIBUTION. HQ AFESC/DEHF developed a distribution list for this document from input provided by each MAJCOM, HQ AFCOMS and others. Any change in address or number of copies needed, or to start/discontinue receiving (base closings, etc.) this document, please notify DEHF using the address listed under Distribution. (See page 1 of this publication.) The distribution list used for this document was finalized 30 days prior to the publication date. DEHF does not have adequate storage space to keep extra copies for late delivery, therefore, requests for special handling may take a minimum of 30 days to process through channels. Please note this document is for January - December 1986.
